wife.

Decembre 2022

Plan

1 Introduction

2 Prediction

2 Prediction

- Prediction and Visualisation Data from Enedis (French company in charge of the public electricity network)
- Distribution of tasks

2 Prediction

Prediction: Step 1

Data Collection

- DataSet Importation : from January 2019 to December 2022.
- Replace missing Data "nan".

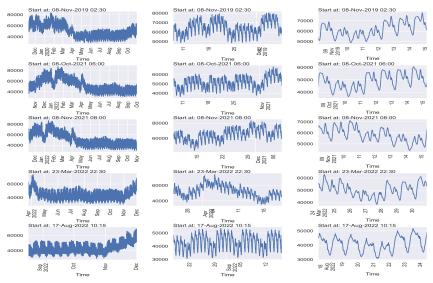

Prediction: Step 2

Data Behaviours

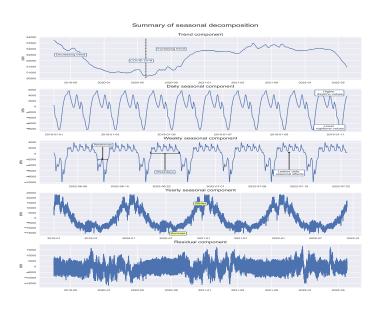

- plot the Data from different scales .
- Checking the Seasonality.

different scales

5 random time window plotted at 3 different scales

Checking the Seasonality

Prediction : Step 3

Fiting model

- Splitting Data .
- Fitting Model .
- Prediction per day.

Predicted day vs Real day Consumption

France Electric Power Energy (MW) consumption 2022-11-10

2 Prediction

Two maps:

- pygal map (Florian Mounier) really shiny but limited
- folium map (specific for choropleth) Yan Holtz
